20KG

COLOR CEMENT

Color Cement is a blend of white or grey ordinary portland cement complying with BS 12 and premium grade pigments complying with BS 1014. The carefully selected pigments that are most colour-fast and light-fast, are ground into the cement to ensure consistency and homogeneity of the finished colour.

Color Cement 是符合 BS 12 的白色或普通水泥和符合 BS 1014 的优质颜料的混合物。精心挑选的最不褪色和耐光的颜料被研磨到水泥中，以确保水泥的一致性和均匀性的颜色。

Color Cement adalah campuran simen portland putih atau kelabu yang mematuhi BS 12 dan pigmen kelas premium yang mematuhi BS 1014. Pigmen yang dipilih dengan teliti yang paling cepat berwarna dan cepat ringan, digiling ke dalam simen untuk memastikan konsistensi dan homogenitas warna siap.

Properties

Appearance	✓ Red ✓ Green
Binder	✓ OPC White Cement ✓ OPC Portland Cement
Filler Material	Calcium Carbonate Powder
Pigment	Premium Grade Pigment
pH	12
Aggregate Size	0.1 mm max
Toxicity	Chemically inert and non-toxic
Coverage	2.8 KG/m ²

Usage

1. Surface must be clean, sound and dry.
2. For old surfaces, ensure that loose or flaking materials and organic growth must be removed by scrapping or brushing with a stiff bristle.
3. If the surface to be applied is very dry, it is recommended to spray water to wet the surface before applying **Color Cement** to prevent dehydration.
