100 Gram

MORTAR ADDITIVE

MORTAR ADDITIVE is a ready to use plasticizing powder additive added into plaster and mortar mixes to increase it's work-ability and adhesion strength. It is specially formulated as a superior alternative to putty lime or slaked lime for cementitious mixes at site. It is suitable for use in interior and exterior areas such as general purpose repair mortar, wall plastering, floor screeds and masonry mortar for laying brick and block walls.

砂浆添加剂是一种即用型增塑粉末添加剂，添加到砂浆混合物中，以增加其工作能力和粘合强度。它是专门配制的，可替代腻子石灰或熟石灰，用于水泥混合。它适用于室内和室外区域，如通用修补砂浆、墙面抹灰、地板砂浆和砌筑砖和砌块墙的砌筑砂浆。

MORTAR ADDITIVE adalah aditif serbuk plastik siap digunakan yang ditambahkan ke dalam campuran plaster dan mortar untuk meningkatkan kemampuan kerja dan kekuatan kelekatan. Ia diformulasikan khas sebagai alternatif yang unggul daripada kapur dempul untuk campuran simen plaster. Ia sesuai digunakan di kawasan dalaman dan luaran seperti mortar pembaikan, melep dinding, lapisan lantai dan mortar batu untuk meletakkan dinding bata dan blok.

Properties

Appearance	Off white
Additives	Water soluble polymeric fibers for improved work-ability and strength
pH	8.5
Pot Life	Approx. 1 to 1.5 hours after addition
Dosage Ratio for Plastering	1. 100 Gram sachet mortar additive 2. 50KG bag cement 3. 150KG – 200KG Sand
Dosage Ratio for Masonry	1. 100 Gram sachet mortar additive 2. 50KG bag cement 3. 250KG – 300KG Sand
Dosage Ratio for Screeding	1. 100 Gram sachet mortar additive 2. 50KG bag cement 3. 330KG – 400KG Sand
Packing	100 sachets/bag
